

Writing a HTML Document

Required Tools:

- A plain-text editor (eg. vi, gedit, notepad, ...)
- A Web browser (eg. Firefox, Chrome, IE, ...)

Steps:

- Write the document and save it with .htm or .html extension.
- Optionally, validate the document (In a GNU/Linux system, validation can be done using the tidy program, eg. tidy -e abc.html. Or, an online service can also be used, such as [W3C Markup Validation Service](#)).
- Open the document using a Web browser ('File - Open File' or Ctrl+O).
